

ROMAIN SUBERVILLE

Data Engineer

STRENGTHS

Autonomous & proactive

Swift ownership of high-stakes topics and mentoring of team members.

Strong interpersonal skills & sense of priorities

Effective bridge between business objectives, technical constraints and project delivery.

Organised & rigorous

Structured execution, controlled testing, reliable deliverables.

Solution-driven

Actively contributes to the continuous improvement of tools and processes

With 9 years of experience, I design and industrialise end-to-end data pipelines : ETL ingestion, data preparation and optimisation, data warehouse loading, and value creation through reporting and data visualisation.

Currently seeking new challenges in the fields of Cloud/SaaS and AI (chatbot/assistant & workflow automation).

Since 04/2024
Capgemini – Air France
BI Consultant
Responsible for strategic initiatives relating to the HR Data Warehouse. Design and optimisation of data flows, ETL migration, business intelligence visualisation and stakeholder coordination. Cross-functional role combining technical expertise, project vision and team guidance within a Cloud transformation environment.

03/2024
11/2022
Capgemini – Safran
ETL/BI Technical Lead
Project to redesign the information system and consolidate databases. Oversight impact assessments, specifications and migrations of SSIS flows to Talend and SSRS/Excel reports to Power BI.

10/2022
03/2022
Capgemini – EDF
Informatica PowerCenter ETL Developer
Key role in the development and reliability of data flows. Impact analysis, workload estimation and interface optimisation within an Agile framework promoting responsiveness and quality. Contributed to delivery robustness through qualification, testing and deployment preparation via GitLab.
